ABOUT

Product Designer with 4+ years of experience crafting end-to-end experiences across enterprise, AI-powered, web, and mobile products. Skilled in systems thinking, user research, interaction design, prototyping, conversational UX, and AI-assisted workflows. Experienced in translating complex user and business needs into intuitive solutions and collaborating with cross-functional product, engineering, and research teams to deliver impactful, user-centered, and data-informed outcomes.

EXPERIENCE

Product Designer | PennTAP

Aug 2025 – May 2026

- Designed and delivered a grant allocation dashboard for \$40M EPA-funded RISE PA program, led end-to-end UX from stakeholder research and journey mapping to high-fidelity Figma prototypes and implementation-ready designs that improved reporting efficiency by ~70%.
- Championed a unified design system across 5+ enterprise financial tools, defined component architecture, interaction patterns, and instructional guidelines that reduced cognitive load, and decreased support queries by 38%.
- Collaborated cross-functionally with stakeholders, program directors and engineers across discovery, design workshops, prototyping, and handoff, driving research-informed decisions and achieving 100% design-to-engineering handoff consistency.

UX Design Instructional Assistant | Pennsylvania State University

Sep 2024 – Jul 2025

- Mentored 50+ students in UX research, usability evaluation, web development, and accessibility, translating research findings into actionable design recommendations and helping resolve 80% of identified usability issues across iterative design cycles.

UX Analyst | Deloitte

Jan 2024 – Jul 2024

- Partnered with product managers and engineers on Michigan State's Unemployment Insurance (MI UI) citizen-facing platform, refining user flows, conducting design QA and authoring 400+ usability-focused test cases to validate critical user journeys across Agile releases; reduced key workflow steps by 45% and improved SUS scores from 68 to 80.

UI/UX Designer | Tandem Digital

May 2022 – Jan 2024

- Led end-to-end UX/UI design for 5+ web and mobile products across travel, construction, and consulting; used usability testing and UX audits to optimize information architecture and critical user flows, increasing task completion by 55% and reducing time on task by 40%, while supporting client growth and product adoption.

CASE STUDIES & PROJECTS

Smart Charge | 1st Place, Figma Config Build Challenge · Behavioral & Systems Design

- Designed a native iOS 26 Battery Settings feature with personalized charging thresholds and time-based triggers, transforming reactive panic-charging into a proactive, configurable experience aligned with Apple's Human Interface Guidelines.
- Defined context-aware trigger logic across 5 conditions and edge-case behaviors, projected 45% reduction in reactive low-battery events.

Campus Copilot - Student Self-Service Assistant | Conversational AI · Agentic Workflows

- Shipped an end-to-end AI assistant spanning 6 campus service domains with intent-driven adaptive workflows, grounded in user research and interviews with 30+ newly enrolled students to uncover navigation pain points — reducing search friction by 90%.
- Utilized Claude Code workflow to rapidly prototype and iterate conversational flows, integrated API and shipped to production, validated through usability testing with 98% first-attempt task completion and reduced time of task to ~10 seconds.

PayPal Collections | Fintech · UX Research · Experience Design

- Conducted user research with 10+ freelancers to surface workflow gaps in PayPal's Activity feed, identifying the friction of organizing mixed personal and business transactions.
- Conceptualized and prototyped a user-curated "Collections" feature that brings personalization and transactional organization to the Activity page, bringing improvement in task clarity and 60% reduction in reliance on external spreadsheets/tools.

SKILLS

Design: UX design · Interaction design · information architecture · design systems · wireframing · high-fidelity prototyping · responsive design · accessibility (WCAG 2.1) · user flows · visual design · data visualization · KPI-driven optimization · journey mapping · empathy maps

Research & Strategy: mixed-methods research · user interviews · usability testing · A/B testing · heuristic evaluation · contextual inquiry · personas · storyboarding · questionnaire design · diary studies · card sorting · tree testing · voice of customer · competitor analysis

Tools & Technologies: Figma · Framer · Adobe Creative Suite · Miro · UserTesting · Google Analytics · Maze · HTML · CSS · JavaScript · TypeScript

AI: LLM-based experience design · agentic workflows · React · conversational UI · generative UI · context engineering · human-in-the-loop (HITL) · model evaluation & guardrails · AI-assisted prototyping & design-to-code · MCP · LLM/API integration · RAG · ML · human-centered AI (HCAI)

EDUCATION & CERTIFICATIONS

M.S. Informatics (HCI), Pennsylvania State University — (GPA: 3.9/4.0)

Aug 2024 – May 2026

B.Tech. Computer Science & Business Systems, VNR VJTIET

Aug 2019 – May 2023

Certifications: Microsoft: Professional UX Design | Google: Professional UX Design & Data Analytics | Georgia Tech: HCI
